

# ZAS-24-WT POWER SUPPLY

- Output voltage: 24 VDC
- Type: plug-in

APONE offers many useful accessories dedicated to APONE measuring devices. Accessories such as cables, junction boxes and mounting brackets facilitate electrical and mechanical installation of devices. Programmers, signal converters, data loggers and HMI touch panels are accessories that may be useful at the stage of commissioning devices or to perform a specific measurement task.
The website presents the most popular accessories that facilitate the installation and integration of APONE measuring devices. However, if the list does not contain the required elements, please contact us.
